

GEORGE CREEK  
DISTRIBUTION SYSTEM  
Schedule of Rights

Priority	Claimant	Flow Interest	Flow CFS	Acreage	Branch	Remarks
1873	LaRue B. Yates	Stock Water	1.00		West	This right is not effective until the water is 2.5 cfs or less in George Creek. Yates then has the first 1.00 cfs right of first priority to the available water. This right exists only during the low flow stockwatering periods.
1884	George Creek Irrigation Company	33/57 of 66.0 cfs	38.20	1,879.98	East-West George	When the flow of George Creek, measured at the Lone Rock Divider, is between 2.5 cfs and 66.0 cfs all 1884 priorities will be entitled to their proportionate interest of the available water.
1884	LaRue B. Yates	19/57 of 66.0 cfs	22.00	948.19	West	
1884	Wallace Spencer	3/57 of 66.0 cfs	3.48	102.53	West	
1884	Edward J. Holtman	2/57 of 66.0 cfs	2.32	82.13	West	Only effective as long as the water is above 66.0 cfs, and for the period between April 1 to July 1.
May 23 1927	Byron L. Chadwick	High Water	0.80	* 123.60 Suppl.	East	
Aug 27 1927	Roy A. Teeeter	High Water	1.50	* 86.28 Suppl.	East	Only effective as long as the water is above 66.8 cfs, and for the period between April 15 to July 1.

During the April 1 to July 1 irrigation period there are 57 shares of stock in the flow of George Creek between 2.5 and 66.0 cfs. During the July 2 to November 15 irrigation period there are 54 shares of stock in the flow of George Creek between 2.5 and 66.0 cfs. The individual CFS flow is computed on 100% fulfillment of 1884 rights, and the flow interest has been converted to water hours per week. See Operating Schedule for Irrigation (April 1 - July 1) and Operating Schedule for Irrigation (July 2 - November 15) for specific details.

\*Acreage included in the 1,879.98 acres of the George Creek Irrigation Company.
